

# Environmental Policy

PMP Print /Griffin Press are part of Australasia's leading integrated provider of consumer insight, printed communications solutions and Hardback, Paperback books across Australia and New Zealand.

PMP/Griffin Press recognizes that all businesses impact on the environment in a variety of different ways. As such we are committed to the continual improvement of our environmental performance in relation to our services and operations.

PMP/Griffin Press achieves its sustainability responsibilities to the environment through dedicated investment in striving to quantify and reduce carbon emissions, preventing pollution, minimizing waste and conserving natural resources.

PMP/Griffin Press meets environmental standards through compliance with legislation, associated regulations, and other requirements to which the organization subscribes, and seeks to continually improve its environmental management systems and procedures, and have a positive influence in the workplace and the community.

PMP/Griffin Press applies the four “R’s” principle in all phases of our operations – reduce, re-use, recycle and then replace. We therefore strive to investigate practical opportunities to minimize raw material consumption, improve energy- and water-use efficiency, and recycle waste streams wherever practicable. PMP partners with its staff as well as its customers, suppliers and contractors in order to achieve these environmental goals.

PMP/Griffin Press continually educates its personnel on environmental policies and legal obligations and requires all employees to cooperate in achieving better practice performance. It is the responsibility of all employees, visitors and contractors to fully support this policy through active participation and co-operation. The policy will be reviewed and updated as appropriate.

This environmental policy will be displayed at all times and is openly available to members of the public via our website: <http://www.griffinpress.com.au/>
